Customizing Job Launch Language

Published on 01/03/2017

As an Administrator, you can customize the Job Launch naming convention within your account. For example, instead of **'My Job Launches'** your end user could see 'My Requests' or 'My Creative Briefs.'

To change the name for "Job Launch" throughout your account, navigate to **Account > Account Settings > Customize > Job Launch.** Here, you will see settings for the job launch, that include changing the default name of **'Job Launch'** and **'Form.'** Click **'Save'** to finalize your changes.
