

Unable to Start a New Job Request

Published on 06/03/2017

If you log in to your **My Job Launches** workspace and the green **Start New** button is grayed out, it is because you have not been given access to any job launch forms. If you're a inMotion User, this must be done in your User record. If you are a Contact, this must be enabled in your Contact record. Contact your Administrator or follow the steps in the related article to resolve this issue.
