# Setting your Default Workspace

Published on 08/10/2016

inMotion allows you to customize your default workspace, giving you the ability to choose which page loads upon initial login.

To change your default workspace, click on your avatar icon in the top right corner of the page. From the **Settings** option, choose your preferred workspace from the **'When I log in, take me to...'** drop down menu.  Finally, click the **SAVE CHANGES** button near the bottom of the screen.
