Team Training Outline

Published on 07/20/2017

What is the Team Training Outline?

This document is to help prepare your Customer Success representative for the Team Training Call. Take a moment to think about the process you want your team to follow in inMotion. The idea is to train Staff Users only on the functions they require to get the job done. Please be prepared to talk about your specific process as it relates to each section of the training.

Download the following PDF, fill out the form and save! Please return this form to your Customer Success representative as soon as possible prior to your Team Training Call.
